

Informative hypotheses evaluation

Intro

Rebecca M. Kuiper

Department of Methodology & Statistics
Utrecht University

Curious to know

- Your expectation of the course?
(mainly regarding 'hypothesis testing')
- Do you have your own data?
- What do you know w.r.t.
 - null hypothesis testing?
 - model selection?
(Bayesian and using information criteria like AIC)
- Do you use any of the methods (and why)?
- Which software do you use (R, JASP, SPSS, ...)?

Note: Estimation vs hypothesis evaluation.

Content

- Null hypothesis testing
- Informative hypotheses
- Model selection using information criteria
(focus on GORIC and GORICA)
